## How to aadhar card through csc

About the Joint Service Centre or CSC Is a program initiated by the Ministry of Electronics and IT, The Indian Government. These centres act as access points for the delivery of several state-run schemes nationwide and thus contribute to a financially and inclusive society. With the presence of PAN India, these centres are more than service delivery points in the country's rural areas. These centres are positioned as agents of change that promote rural entrepreneurship apart from building rural capacity and livelihoods. CSC India Limited e-Governance Services is a special purpose vehicle established under the Companies Act 1956 by the Indian Government to oversee the implementation of the CSC scheme in India and it helps provide a centralised cooperation framework for the distribution of services to the people through these centres as well as ensuring the sustainability and viability of the scheme. The Joint Service Centre or CSC was initiated by the Indian government as part of the National E-Governance Plan Scheme to provide the government to citizens (G2C) and businesses to citizen services (B2C) under Bharat Nirman. The ultimate goal of these centres is to provide doorstep services to Indians. Under the scheme, budget allocation was done to create 1,00,000 CSC in rural areas and around 10,000 CSC in urban areas. The main objective of these centres is to provide cost-effective and high-quality e-governance services to Indian citizens. The Joint Service Centre or CSC is an information and communication technology access point established under the National e-Governance Project by the Indian government. The plan includes the goal of setting up a network of more than 10,000 CSCs across India that will provide much-needed information and services to rural residents under the service in India. CSC acts as an important kiosk that has personal computers, wireless connections and other related equipment. Using other related computers and equipment, the CSC will provide healthcare, education, e-governance, entertainment and other private and private-related multimedia content. Services including telephone drug transmission, computer training, scanning, office applications, printing, digital imaging, CD burning and other computer-related activities can also be done in these centres. Common Services Centers Features The scheme is implemented under the public-private partnership framework and its features include Building rural capacity and livelihoods To provide private sector services To position as agents change to various government and non-governmental services To focus on to provide one-stop solutions for several governments to the people and businesses to the people's services. To provide multi-dimensional initiatives (based on community needs) At this time, a CSC will cover a cluster of 6 villages (6,00,000 villages network). Various G2C services of the ministries and departments of the Central Government, in addition to state government-specific service providers, were implemented into the Seva Digital portal for transmission to residents in remote and remote areas of India through CSC initiatives. 1. Bharat Bill Pay in India, the first billing processing platform of its kind is here to change the way bills are repaid. Introducing a transformation to India's bill payment industry, Bharat BillPay helps everyone pay through the same. One can pay bills for categories such as electricity, mobile, bandwidth and landlines, DTH, Gas, Water, and more. As an officially authorized unit for bill collection, this unified ecosystem brings banks, not banks online payment platform under one roof. Bharat Bill Pay's two main partners are: 1. Bharat Bill Payment Central Unit (BBPCU) which implements financial, technical and business needs for the entire infrastructure and its members. India's National Payment Corporation (NPC) operates as a valid BBPCU. The Bharat Bill Payment Operating Unit is approved, working in compliance with BBPCU standards. 2. BBPOUs establishes billers, platforms, payment gateways; and develop network agents and user touchpoints to manage bill payments through different distribution networks, including self-service, simplifying, digital, and manual methods. 2. FASTag via CSC Network FASTag is an NHAI-regulated Electronic Toll Collection system in India. FASTag is easy to use, a rechargeable tag that allows you to deduct instant toll charges. and make sure you drive through the toll door without waiting for a physical cash transaction. Tags use Radio Frequency Identification (RFID) technology, once your tag has been activated the tag must be attached to the windscreen of the car. This is now available via national and state highways at more than 425 toll points. CSC SPV works with NHAI to provide FASTags via the CSC network. After acquiring it through the Seva Digital Portal, VLEs will dissuade FASTags at the toll plaza; and register customer details on the CSC portal, and attach the tag to your car's windscreen after the tag is successfully activated. 3. Passport service via CSC In 2014 the Ministry of Foreign Affairs collaborated with CSC SPV to introduce Seva Passport services throughout the countryside via the CSC. services accessible via CSC provide registration services for passports. After filling in and uploading the customer's passport application form will get a notification to visit the nearest Kendra Passport on a specific date for further documentation. Passport services via CSC are one of the most transparent and innovative strategies in India. 4, the New PAN Card application is operated by CSC in collaboration with UTITSL and NSDL. The NSDL-based PAN Card Service was launched for CSC in February 2016. During 2016-17, a total of 28.94 PAN Lakh Card applications were requested via CSC. 5.
